

Friday Quiz

Name _____

September 13, 2019

Vocabulary _____ / 20 Math _____ / 35 LA _____ / 10 Science _____ / 16

Math – Directions: Solve for each. Show your work when possible. Five points each.

From Monday: Lesson 1.7 – Solve (See the video!)

1
$$\begin{array}{r} 428,731 \\ - 175,842 \\ \hline \end{array}$$

2
$$\begin{array}{r} 920,026 \\ - 535,722 \\ \hline \end{array}$$

3
$$\begin{array}{r} 253,495 \\ - 48,617 \\ \hline \end{array}$$

From Tuesday: Lesson 1.8 – Draw a Bar Diagram (See the video!)

1 How many square miles larger is the surface area of Lake Huron than the surface area of Lake Erie?

Surface Area of the Great Lakes	
Lake	Surface Area (in square miles)
Lake Superior	31,700
Lake Michigan	22,278
Lake Huron	22,973
Lake Erie	9,906

From Wednesday: Lesson 2.1 – Write an equation for each (See the video!)

1 2 times as many as 8 is 16.

$$\underline{\hspace{2cm}}$$

2 42 is 6 times as many as 7.

$$\underline{\hspace{2cm}}$$

From Thursday: Lesson 2.2 – Draw a Bar Diagram (See the video!)

1 At the zoo, there were 3 times as many monkeys as lions. Tom counted a total of 24 monkeys and lions. How many monkeys were there?

Did you know you can practice this at home? Yes No

Friday Quiz

Language Arts - (See the video!) Five points each

Write the sentences correctly.

1. At gatorland in Orlando Florida, you can learn how to trane a alligator.

2. If you vizit Dinosaur World in Cave City Kentucky, you can digs for fossils.

Science

R. A. C. E. - Read and answer

Living Factors in Deserts

Some people think of deserts as hot, dry wastelands. That can be true, sometimes. In areas of shifting sand where it never rains and strong winds blow, such as parts of the Sahara Desert in Africa, plants and animals are rare. But deserts have areas that get some water, and those areas are full of life.

Fewer kinds of plants and animals live in deserts than in wetter environments. Desert plants and animals have **structures** and **behaviors** that help them survive in a dry environment. You can see plants and animals with these adaptations in parts of the deserts found in the southwestern United States.

How is it that some desert areas are full of life?
