Regions

A **region** is an area in which many places are nearly the same. The United States is divided into five regions. These regions are the Northeast, the Southeast, the Midwest, the Southwest, and the West. Places within a region may share certain landforms. A **landform** is a natural feature on Earth's surface. Landforms include mountains and rivers. Places within a region may also be different from one another. For example, in the Midwest, some areas have fertile plains. Other areas have lakes.

What do places in the same region share?
