RACE. Cite evidence from the text to answer the question. Grammar counts.

Organisms that eat other organisms are **consumers**. Consumers can't make their own food. Consumers have to eat other organisms to get their matter and energy.

Some consumers eat plants and plant parts. Deer eat grass and leaves. Gophers eat roots. Squirrels eat grass, nuts, and berries. Caterpillars eat leaves. Animals that eat only plants to get their food are called **herbivores**.

Some animals don't eat plants. Snakes don't eat nuts and berries. Hawks don't eat grass. Spiders don't eat leaves. So how do they get their matter and energy? They eat other animals. Snakes and hawks eat gophers and squirrels. Spiders eat insects. Animals that eat other animals are called **carnivores**.

Some consumers, like humans, bears, raccoons, robins, and crayfish, eat both plants and animals. They are called **omnivores**.

Why do consumers eat other organisms?
