

# Wednesday Quiz!

Name \_\_\_\_\_

November 6, 2019

Vocabulary \_\_\_\_\_ / 20    Math \_\_\_\_\_ / 45    LA \_\_\_\_\_ / 10    Science \_\_\_\_\_ / 16

**Math** – Directions: Solve for each. Show your work when possible.

**From Monday: Lesson 4.4 – Divide tens, hundreds, thousands (see video)**

1  $240 \div 6 =$  \_\_\_\_\_

2  $5,400 \div 9 =$  \_\_\_\_\_

3  $4,800 \div 6 =$  \_\_\_\_\_

4  $420 \div 7 =$  \_\_\_\_\_

**From Tuesday: Lesson 4.5 - Estimate with compatible numbers (see video)**

1  $358 \div 3$

2  $784 \div 8$

3  $179 \div 9$

Show your work.

**Review – From Last Week: Lesson 4.2 – Find the quotient & remainder (See video)**

**Divide. Draw a quick picture to help.**

1  $4 \overline{)35}$

2  $23 \div 8$

Quotient \_\_\_\_\_ Remainder \_\_\_\_\_

Quotient \_\_\_\_\_ Remainder \_\_\_\_\_

Who is your teacher? ☐ McPhail-Hastings    ☐ Mercen    ☐ Swiger

# Wednesday Quiz!

## Language Arts

Write the sentences correctly.

1. Next time you eat you vegetables, think about what you is eating.

---

2. Plants has lots of diffrent parts which we can eat.

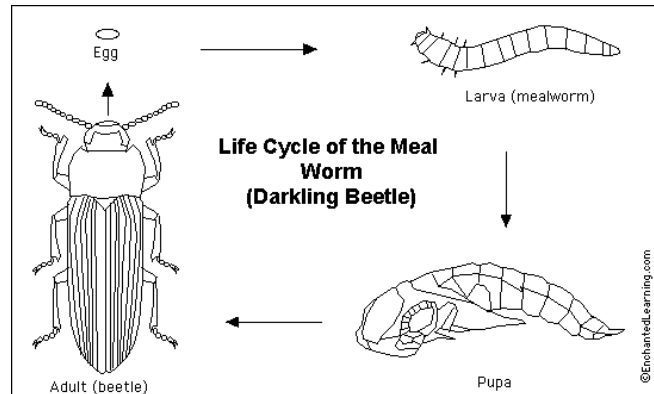

---

## Science

Cite evidence from the text to answer the question. (R.A.C.E)

The darkling beetle goes through four stages in its life cycle. The stages are egg, larva, pupa, and adult beetle. Female beetles lay 500 to 1,000 eggs at a time. The eggs at 1 millimeter (mm) are almost too small to see. Tiny larvae hatch from the eggs in about a week.

The pupa is a resting stage. The insect's body begins to change into an adult beetle. The pupa stage lasts about 2 weeks. Then the beetle comes out as an adult. This cycle of changes is called complete metamorphosis.

**What is complete metamorphosis? (cite your answer)**
