# Friday Quiz

## Grammar Review – Rewrite both sentences perfectly. (See the video!)

**Fix everything: Grammar. Spelling. Punctuation. Legible handwriting.**

1. On August 5 2012, a space robot traveled to mars for a important mission.

2. The rover named curiosity had cameras, so that we could see what mars look like.

## Reading Comprehension

**Part I: Annotate the paragraphs (5 points) - Part II: Answer the questions (5 points ea.)**

Once the howl of the wolf was heard all over the United States' wilderness. But by 1900, only a few thousand wolves roamed free in the U.S. In 1973, the government put wolves on the endangered-species list.

Today, animal activists are working to bring back the wolf. In 1995, 31 wild wolves from Canada were released in Yellowstone National Park. Nine wolf pups were born in the first year. Animal activists want to repeat this success story in New York, Maine, New Mexico, and Arizona.

But, some farmers and ranchers worry that this meat eater will hunt their **livestock**. In New York, dairy farmers worry that wolves will attack their dairy cows. In New Mexico, ranchers worry about wolf attacks on their cattle and sheep.
