## ELA – Reading (5 points each.)

Are you an average American kid? If so, you probably watch TV for almost 5 hours a day. That means you spend more than two months a year glued to the tube. But some kids are just saying, "No," to TV.

Take Meghan Kelley of Pembroke, Massachusetts. She used to spend a lot of her free time in front of the TV. But in 1996, Meghan kicked her TV habit for good. Her days of tuning in ended when she and her classmates at North Pembroke Elementary School took part in National TV-Turnoff Week.

After the first week, Meghan decided to test herself further. “I wanted to see how long I could go without TV,” Meghan said. “Could I do it for a year?” The answer turned out to be **affirmative!**

Although sometimes she missed

TV, Meghan found life without cartoons and commercials more interesting. She joined two soccer leagues and began playing basketball and softball. Because Meghan was studying more, she also got much better grades.
