

# Organisms Depend on One Another - pg. 295-297

## Across

6. Plants need this to make seeds.
7. Plants depend on these to bring pollen.
9. The acacia tree depends on these for protection.
10. Sometimes these drop the seeds they are carrying.
11. Trees provide this for birds.

## Down

1. Bees and butterflies cannot survive without these plant parts.
2. Seeds with these can stick to animals.
3. Animals depend on this for food.
4. This is food for bees.
5. Animals eat these from plants.
8. This helps disperse seeds.
12. New plants will get more of this if they sprout away from their parent plant.
