

## Solar Lighting pg. 27-31

### Across

3. Doctors struggled in Nigeria because of this.
6. They built these to learn what worked well and what needed improvement.
8. These help people know how to use the system.
11. They teach local technicians to do this.
12. Engineers and technicians need to consider where to do this to the solar panels.

### Down

1. The primary problem was a lack of of quality this.
2. Health-center staff used to be this at night.
4. Students around the United States build the Solar Suitcase for these.
5. It is a major effort for them to do this.
7. They train health workers and these people to maintain the system.
9. They built one of these with a rechargeable battery.
10. Because doctors often bring the case to disaster sites, they made it this.
