

Force & Energy pg. 81-84

Across

2. Gravity is this type of force.
7. A force applied to an object causes it to do this.
9. The ____ two objects are to each other, the stronger the attraction.
10. The strength of gravity's attraction is determined by mass and this.
12. The more energy an object has, the more ____ it can do.

Down

1. The unit used to measure force.
3. The natural attraction between masses.
4. Faster moving objects hit with more of this.
5. The longer a force acts on an object the ____ the object moves.
6. This type of scale measures force to move something.
8. This pulls on all masses with a lot of force.
11. One of the greatest scientists.
