

# Health - Hearing Machine pg. 5 & 6

## Across

- 3.** The Eustachian tube leads from the ears to here.
- 5.** The bones in the ear are very this.
- 7.** The vibrations change into these charges in the brain.
- 10.** Keep this down when listening to music.
- 11.** The auditory never is actually a \_\_\_\_ of nerves.
- 13.** You can get swimmer's ear if water gets under here.
- 14.** This is a piece of very thin skin.
- 16.** The nerves send a message to here.
- 17.** Every hair in your cochlea is attached to one of these.
- 18.** Germs from here can climb into your ears.

## Down

- 1.** An adult's Eustachian tube is this compared to a child's.
- 2.** You will probably do this to ear infections.
- 4.** Vibrations make the drum do this.
- 6.** Kids get infections when these get into the ear.
- 8.** These type of noises cause the hair to move a lot.
- 9.** This bone can be found in the middle ear.
- 12.** Loud noises can cause this.
- 15.** The Eustachian tube opens when you do this.
