

1. Which words describe this shape? Mark all that apply.

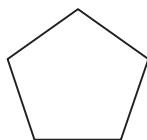

- (A) polygon
- (B) hexagon
- (C) open shape
- (D) quadrilateral

2. Sam drew one side of a rhombus with at least 1 right angle. Draw the other 3 sides to complete Sam's shape.

3. Louie has a stamp with this shape.

For numbers 3a–3d, select True or False for each statement about the shape.

- 3a. The shape has no right angles. True False
- 3b. The shape has 5 angles greater than a right angle. True False
- 3c. The shape has 2 angles less than a right angle. True False
- 3d. The shape has 1 right angle. True False

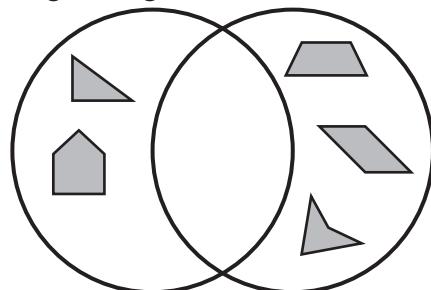

GO ON

4. Jane used a Venn diagram to sort shapes.

Part A

Draw a plane shape that belongs inside the overlap region of the diagram.

**Polygons with
Right Angles** **Quadrilaterals**

**Part B**

How can you describe the shapes that belong in the section where the circles overlap?

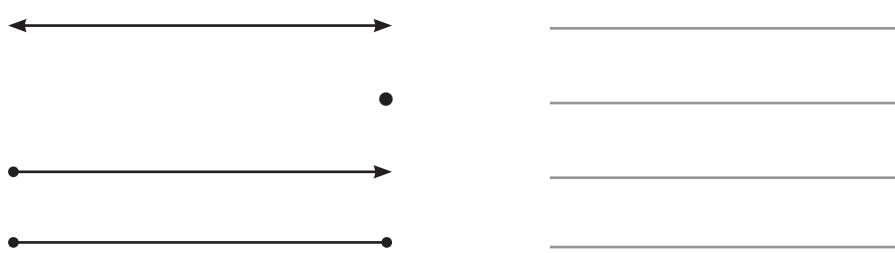

5. Write one of the following words to name each part of the figure.

line

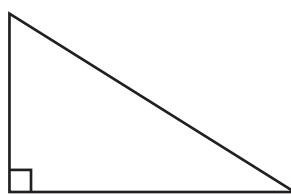

line segment

point

ray

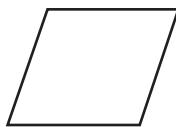

6. Describe the angles and sides of this triangle.

GO ON

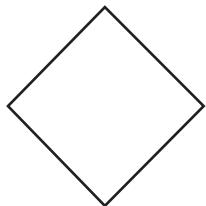

7. Which words describe this shape? Mark all that apply.

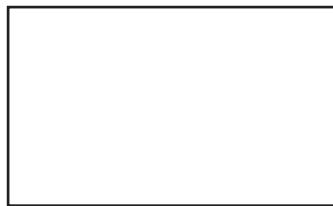

A rectangle **B** rhombus **C** quadrilateral **D** square

8. Divide each shape into the number of equal parts shown. Then write the fraction that describes each part of the whole.

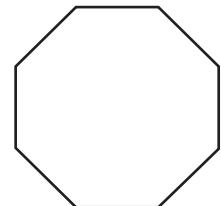

4 equal parts

6 equal parts

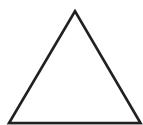

8 equal parts

9. Cho drew a triangle with 3 angles that are each less than a right angle.

For numbers 9a–9d, choose Yes or No to tell whether that triangle could be the triangle Cho drew.

9a.

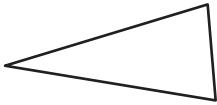

Yes No

9b.

Yes No

9c.

Yes No

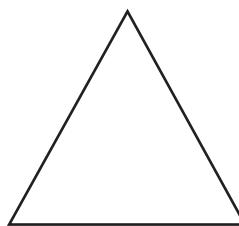

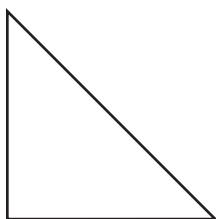

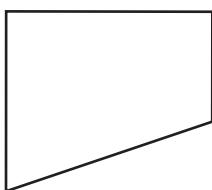

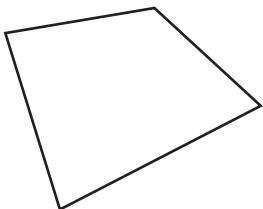

9d.

Yes No

GO ON

10. Look at this group of shapes.

**Part A**

Sort the shapes by sides. How many groups did you make? Explain how you sorted the shapes.

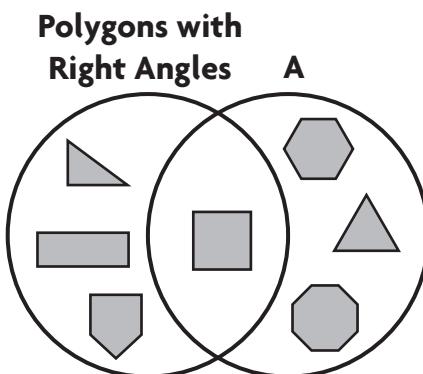

Part B

Sort the shapes by angles. How many groups did you make? Explain how you sorted the shapes.

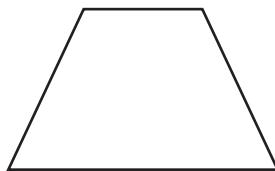

11. Gina drew a quadrilateral that always has 4 sides of equal length and 4 right angles. What quadrilateral did she draw?

GO ON

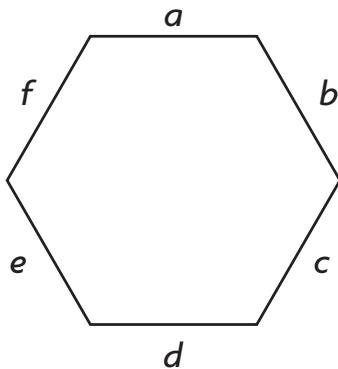

12. Lacy used a Venn diagram to sort shapes. What label could she use for circle A?

13. Victor drew lines to divide a trapezoid into equal parts that represent $\frac{1}{3}$ of the whole area. Draw lines to show how Victor divided the trapezoid.

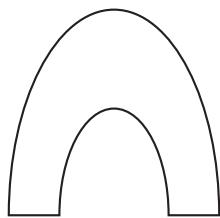

14. Luisa drew this hexagon. Select the pairs of sides that appear to be parallel. Mark all that apply.

- (A) a and b
- (B) b and e
- (C) c and f
- (D) d and a

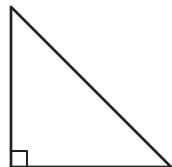

GO ON

15. Tell why this shape is NOT a polygon.

16. Paige drew the triangle at the right. What statements describe the angles? Mark all that apply.

- (A) At least one is less than a right angle.
- (B) One is a right angle.
- (C) All are less than a right angle.
- (D) One is greater than a right angle.

17. Bella drew a quadrilateral with 2 pairs of opposite sides that are parallel. The shape has no right angles and has sides that are of equal length. Draw a shape Bella could have drawn.

18. For 18a–18d, select True or False for each description of a line segment.

18a. straight	<input type="radio"/> True	<input type="radio"/> False
18b. has 2 endpoints	<input type="radio"/> True	<input type="radio"/> False
18c. continues in 1 direction	<input type="radio"/> True	<input type="radio"/> False
18d. part of a line	<input type="radio"/> True	<input type="radio"/> False
